Assistant School Leader Performance Task

STRENGTHENING CULTURE SYSTEMS TO PROTECT INSTRUCTIONAL TIME

KEENA MOORE

Systems Diagnosis

The referral data shows that the highest categories are related to students not being in class or disengaging from instruction:

Key Data Patterns

Skipping: 257 (9th), 187 (10th): RDOL (Refusal to Do Learning): 215 (9th), 152 (10th): Eloping from Class: 100 (9th), 120 (10th)

Analysis

- These behaviors represent academic avoidance, not aggressive or unsafe behavior.
- The most significant risk is lost instructional time before learning even begins.

Root Causes

Transition System Breakdowns

- Students able to skip or leave class
- Inconsistent adult supervision in hallways
- Weak class entry routines (First Five)

Strong Start expectations require transitions to be calm, safe, and efficient with active adult presence.

Inconsistent Classroom Expectations

- Cell phone violations remain high across all grades
- 9th: 91/ 10th: 94/ 11th: 101

This suggests inconsistent enforcement of the cell phone system, leading to classroom disruptions.

Ninth Grade Culture Instability

9th grade leads nearly every category including:

- Skipping, RDOL, threats, violent incidents

This indicates that freshman culture systems were not fully internalized early in the year.

Key Leadership Insight

- *The data suggests the majority of incidents stem from Tier 1 system inconsistencies rather than high-intensity behavioral needs.*
- *Strengthening predictable routines and adult consistency will significantly increase instructional time.*

Adult Deployment Strategy
(Behavior Climate Specialist)

SYSTEMS MONITORING

The BCS will maintain visible presence during high-risk times:

- Arrival
- Passing periods
- Lunch transitions
- Hallway hotspots

Responsibilities include:

- redirecting students to class
- reinforcing expectations
- preventing skipping and eloping

This ensures students remain **in instructional spaces rather than wandering the building.**

TEACHER COACHING

The BCS will also support teachers by strengthening classroom systems:

Focus areas include:

- First Five of Class routines
- cell phone enforcement
- redirection strategies
- maintaining 100% expectations
- Teachers with higher referral patterns will receive targeted coaching cycles.

STUDENT REFLECTION

Students demonstrating repeated patterns (skipping, disruption) will participate in **brief behavior reflection sessions** focused on:

- accountability
- goal setting
- returning quickly to learning & instruction

Adult Deployment Strategy

Mental Health Professional (MHP)

Focus: Tier 3 Mental Health Supports- The Mental Health Professional will remain focused on clinical intervention and compliance responsibilities.

Direct Student Services

Students demonstrating:

- emotional dysregulation
- repeated threats or aggressive behavior
- trauma-related needs
- IEP counseling requirements

will receive:

- individual counseling
- small-group counseling
- behavioral skill-building
- behavior intervention plan monitoring

Systems Coordination

The MHP will also coordinate:

- CARE / MTSS meetings
- Section 504 plan monitoring
- crisis response
- family coordination

Maintaining this focus ensures counseling remains therapeutic rather than acting as a disciplinary removal space.

Preventing Over-Reliance on Removal

*Teachers will be supported in using **Tier 1 strategies first**, including:*

- proximity correction
- clear expectations
- classroom resets

Students will only be escalated to Tier 2/3 supports when patterns persist.

First 30-Day Leadership Moves

1. System Adjustment

Implement a structured hallway supervision plan aligned with Strong Start expectations.
Actions include:

- assigning adults to hallway zones during passing periods
- leadership presence during arrival
- identifying and monitoring skipping hotspots

Goal: reduce class avoidance and increase instructional time.

2. Teacher-Facing Action

Launch Strong Start culture walkthroughs focusing on:

- First Five of Class routines
- clear expectations
- cell phone enforcement
- active monitoring

Teachers will receive immediate feedback and coaching.

3. Accountability Lever

Create a weekly culture dashboard tracking:

- skipping incidents
- RDOL
- cell phone violations
- incident location and time

The leadership team will review data weekly to ensure systems improve and instructional time is protected.
